Vue.js / Nuxt.js / JavaScript / TypeScript / React / HTML 5 + CSS 3
Sass + Less / GraphQL / Liquid / Shopify / Design Systems / Accessibility
Animation / UX + UI Design / Figma / Adobe Creative Suite / Cursor / Copilot

10+ Years of Experience

ZaneRay Group – Senior UI Developer

February 2021 - Present

- Drove technical direction as Lead UI Developer for complex e-commerce web applications, including Headless Vue.js + Nuxt.js and Shopify implementations, ensuring optimal user experience and business performance.
- Led the conceptualization and implementation of the Borealis design system, unifying design language and modularizing components across Vue and Shopify applications. Actively collaborating on the creation of a React version to ensure consistent, scalable products and enhance cross-functional collaboration.
- Modernized the agency's core headless project by migrating and refactoring components to Vue 3 and Nuxt 3, significantly enhancing the design system for improved performance and maintainability. Currently assisting with creating a React version of these core components.
- Provided technical leadership in cross-functional collaborations with Design and Project Management, defining project requirements, scopes, and budgets. Ensured technical feasibility and delivered projects meeting stringent UX, accessibility, timeline, and budget standards.
- Mentored junior and mid-level developers through comprehensive code reviews and pair programming, fostering a culture of best practices and continuous improvement for efficient and scalable development.

Ideabar – Senior Web Developer

December 2017 - February 2021

- Managed and led a team of developers, overseeing project planning, execution, and successful delivery of custom web solutions.
- Built bespoke WordPress and Shopify websites using PHP, HTML, CSS, and JavaScript, precisely tailored to client needs.
- Contributed to business development by writing technical proposals, preparing pricing estimates, defining project scopes, and participating in client pitches and presentations.
- Streamlined department operations by developing and implementing comprehensive standard operating procedures, enhancing efficiency and project consistency.

OGK Creative – Lead Developer

March 2017 - December 2017

- Served as Technical Lead, managing and guiding a global development team (including overseas developers) in the design and build of custom WordPress websites.
- Actively participated in client pitches and project scoping, translating client needs into technical requirements and strategic solutions.

The Martin Group – Web Developer

July 2015 - March 2017

- Developed custom-tailored WordPress websites and themes using PHP, JavaScript, and jQuery, collaborating closely with designers and other developers.
- Contributed to UI/UX design and strategy, encompassing web layout design, UX wireframing, and crafting seamless user journeys.

Manzella Marketing Group – Interactive Designer + Developer

June 2014 - July 2015

- Managed the full development lifecycle for WordPress and Drupal websites, from initial design and development to ongoing maintenance.

Education

SUNY University at Buffalo, May 2014

BFA, Graphic Design

Key Projects

XPEL.com

- Functioned as Lead UI Developer for XPEL.com, a headless e-commerce application serving both B2B and D2C audiences built with Vue.js and Nuxt.js for a dynamic user experience.
- Spearheaded the creation of the frontend design system and a modular component library, enhancing development efficiency and UI consistency.
- Directed task delegation and workflow for the UI team, ensuring seamless integration with BigCommerce for product data and Contentstack for content management, driving a cohesive user experience.

Torus.co

- Engineered a comprehensive modular design system and reusable component library for torus.co, focused on adaptability to diverse and evolving content needs.
- Leveraged a headless architecture, developing the frontend with Vue.js and Nuxt.js, and integrating with Dato CMS for seamless content delivery.
